

## 73. Set Matrix Zeroes

```
def setZeroes(self, matrix):
    m=len(matrix)
    n=len(matrix[0])
    temp= [[-1] * n for _ in range(m)]

    for i in range(0,len(matrix)):
        for j in range(0,len(matrix[0])):
            if matrix[i][j]==0:
                for k in range(n):
                    temp[i][k]=0
                for l in range(m):
                    temp[l][j]=0

    for i in range(0,len(matrix)):
        for j in range(0,len(matrix[0])):
            if temp[i][j]==0:
                matrix[i][j]=0

    return matrix
```
