

## 75. Sort Colors

```
def sortColors(self, nums):
    lst=Counter(nums)
    print(lst)
    ans=[]
    for i in range(3): # Since there are only 3 colors
        ans.extend([i] * lst[i])
    nums[:] = ans
    # for i in lst:
    #     print(i)
    #     for j in range(lst.get(i)):
    #         ans.append(i)
    # nums[:]=ans
    # print(nums)
    # return nums
```
